Sustainable Practices & Resilient Operations

Food Waste

Excess food such as surplus buffet food, leftover plated food, and food scraps from meal preparation are broken down in food digesters.

Responsible Sourcing

Eggs (shell, liquid, and egg products) are sourced from cage-free production facilities.

Responsible Operations

We partner with Recycle Revolution, a local minority owned company to divert waste from the landfills. Together in 2023 we diverted 460 Tons of waste!

Water Reduction

On site weather station controls the irrigation system to prevent over watering.

Energy Reduction

Over 90% of all interior and exterior lighting are LED.

Carbon

Management reviews property energy usage weekly to ensure that all equipment is operating efficiently.

Organic Waste

100% of our landscape materials are composted.

Reduction of Single-Use Plastics

Water refill stations are used in meeting spaces to reduce plastic waste.
