

Decoding AI in Oracle

A Fundamentals Guide for Sponsors, Directors, Managers,
and Users

Presented by: Vinay Kumar and Rick
Pollina, oAppsNET

Do you need NASBA CPE credits?

- Navigate to website: iofm.cnf.io
or scan the QR code →
- Check-in and check-out of your sessions to track your attendance for NASBA CPEs
- Certified with IOFM? No need to check-in and out of sessions. Self-report CEUs on IOFM.com instead after the event!

AP & AI in 2026: A Quick Quiz

~~This is already in your ERP. Today, let's find the parts that help you most.~~

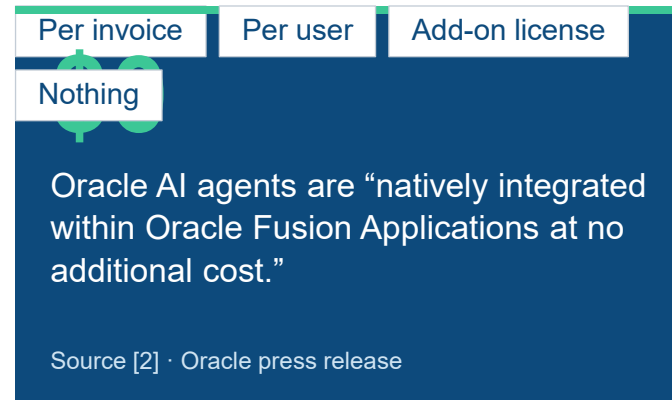

1

What share of finance teams are using AI today?

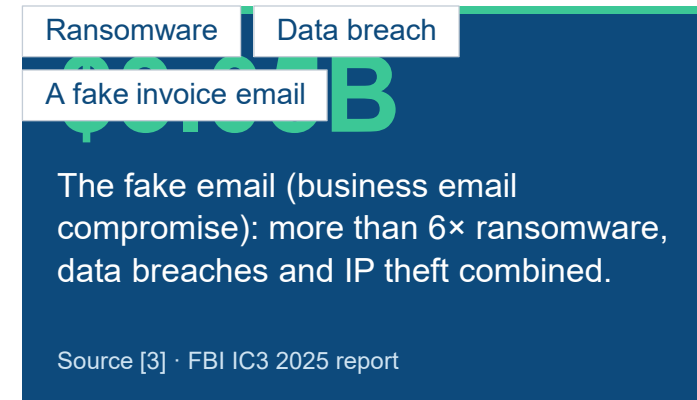

2

What does Oracle charge for the Payables Agent in Fusion?

3

The costliest cybercrime for US businesses?

Sources · [1] Gartner, Nov. 18, 2025: <https://www.gartner.com/en/newsroom/press-releases/2025-11-18-gartner-survey-shows-finance-ai-adoption-remains-steady-in-2025>

Your Speakers Today

One of us helped build Oracle's applications. The other helped customers put them to work.

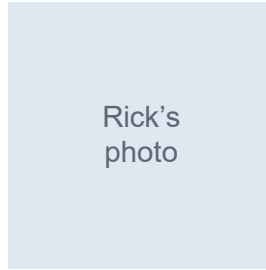

Vinay Kumar

Head of Strategy & Solutions, oAppsNET

- ◆ 22 years working with Oracle ERP
- ◆ Spent 14 years at Oracle, most recently as Director of Product Management
- ◆ Now leads product strategy at oAppsNET for accounts payable and finance operations

Today: AI basics and what Oracle offers today

Rick Pollina

[Title], oAppsNET

- ◆ Previously with Oracle Consulting
- ◆ [Years working with Oracle ERP]
- ◆ [What Rick does at oAppsNET]

Today: [Rick's part of the session]

Who We Are

oAppsNET helps finance teams get more out of the Oracle ERP they run today.

Accounts payable

Invoices are captured, coded and sent for approval as they arrive.

Cash application

Customer payments are matched to open invoices.

Supplier management

New suppliers are set up, and their details kept up to date.

All of it runs on **Oracle E-Business Suite** or **Oracle Fusion Cloud**, so Oracle stays your system of record.

Why you can trust us

- ◆ More than 25 years working with Oracle ERP
- ◆ Independently audited for SOC 1 and SOC 2 Type 2
- ◆ Teams in the US and India

ORACLE

Partner

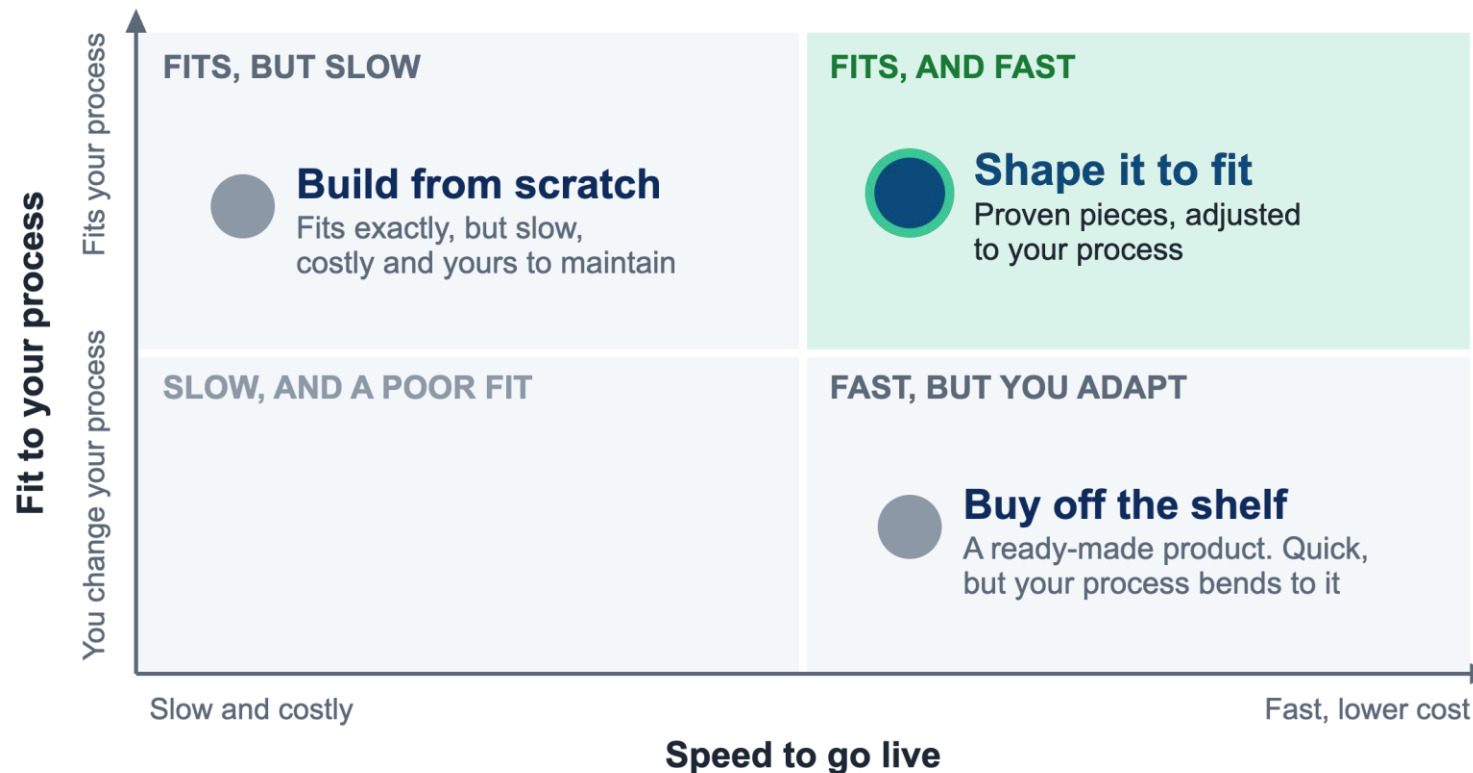

SOC 2
TYPE 2

Fit or Speed? You Don't Have to Pick One

Most teams think they have to choose. They don't.

THE BETTER QUESTION

How much do we need to shape?

Not "buy or build?"

Most teams get the best result from a proven product, adjusted to how they work.

AI makes shaping easier: **the system can follow your standard operating procedure (SOP), not the other way round.**

Today's Journey

We'll follow one invoice from inbox to payment, and answer for every role in the room.

The basics

What AI is, and how to stay in control.

What Oracle gives you

15 AI capabilities, and what each one does for AP.

Finding your fit

Fit AI to your SOP, and pick your first step.

See it live

Two demos on real AP work.

Your questions

Answers for every role:

Sponsor

Director

AP Manager

User

Your Scorecard, and a Mystery

Two things to do while we go: **score your team**, and **solve the invoice**.

Your AP AI scorecard

- 1 **Read all 10 questions now.** Some you can answer straight away.
- 2 **Fill in the rest when you're sure.** The answers will come as we go.
- 3 **Add up your score at the end**, and see where your team stands. It's yours; nobody sees it unless you want them to.

Right now: how confident are **you**, personally, explaining AI to your CFO?

1 = not at all · 5 = very confident

INVOICE

No. 10482 · Net 30

Supplier	Lone Star Office Supply
PO number	PO-7731
40 ergonomic chairs	\$4,200.00
Total due	\$4,200.00

Remit to: First Coastal Bank · Acct ending 9917
"Please note our new bank details."

There are two problems with this invoice. Keep your guess in mind. No need to say it out loud: we'll reveal one answer at a time as we go.

PART 1 OF 4

The Basics

What AI is, how it works, and how you stay in control.

PART 1
The basics

PART 2
What Oracle gives you

PART 3
Finding your fit

PART 4
See it live

What Is an AI Model?

A model learns a pattern from examples, then uses it to answer something new.

	GOES IN		LEARNED FROM		COMES OUT
Spam filter	An email	→	Millions of emails already marked spam or not	→	Spam, or not spam
Credit score	A loan application	→	Decades of repayments who paid back, and who didn't	→	A risk score
Invoice coding IN AP	A new invoice	→	Thousands of invoices your team has already coded	→	A suggested GL code
Language model LIKE CHATGPT	A sentence	→	Billions of pages of text written by people	→	The most likely next words

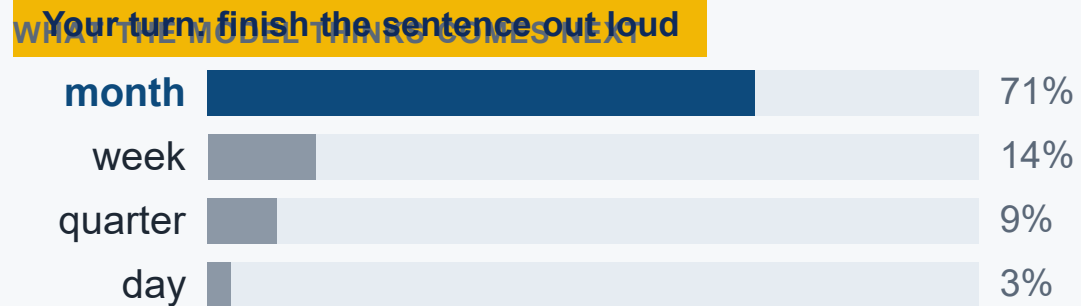

Models have quietly filtered your email and scored loans for years. **ChatGPT is the same idea**, trained on far more text.

It Predicts the Next Word

That's all a language model does: it picks the most likely next word, one word at a time.

“Please approve the invoice by the end of the
”month

Your turn: finish the sentence out loud

You just did what ChatGPT does.

Illustrative figures

It isn't looking anything up

It picks the most likely word based on what it has read before.

It always sounds sure of itself

Sounding natural is its goal. Being right is a different goal.

It can make things up

Ask for the total of an invoice it has never seen, and it may still give you a number.

That's why guardrails matter

Much of what Oracle offers is about keeping this in check.

From Model to Agent, One Piece at a Time

The words you keep hearing, in the order they fit together.

THE PIECE	IN PLAIN WORDS	WHAT TO KNOW
1 Model	The brain. It predicts the next word.	You've just seen how it thinks.
2 Prompt	Your instruction.	The skill is knowing your process, not clever wording.
3 Context	What you hand it for this task: the invoice, the PO, your policy.	Better context beats a better prompt.
4 Memory	What it keeps between tasks.	By default it forgets. Ask what it keeps, and where.
5 Tools	Its connections to your systems, like reading from the ERP or sending an email. 🔌 MCP is a standard plug for these connections	ASK YOUR IT TEAM Which systems can it reach? Can it only read, or also change things?
6 Rules	What it may and may not do.	You set these, not the vendor.

=
An agent

All six pieces,
working together
in a loop.

The Agent in Action

Watch the six pieces work together on **our invoice**.

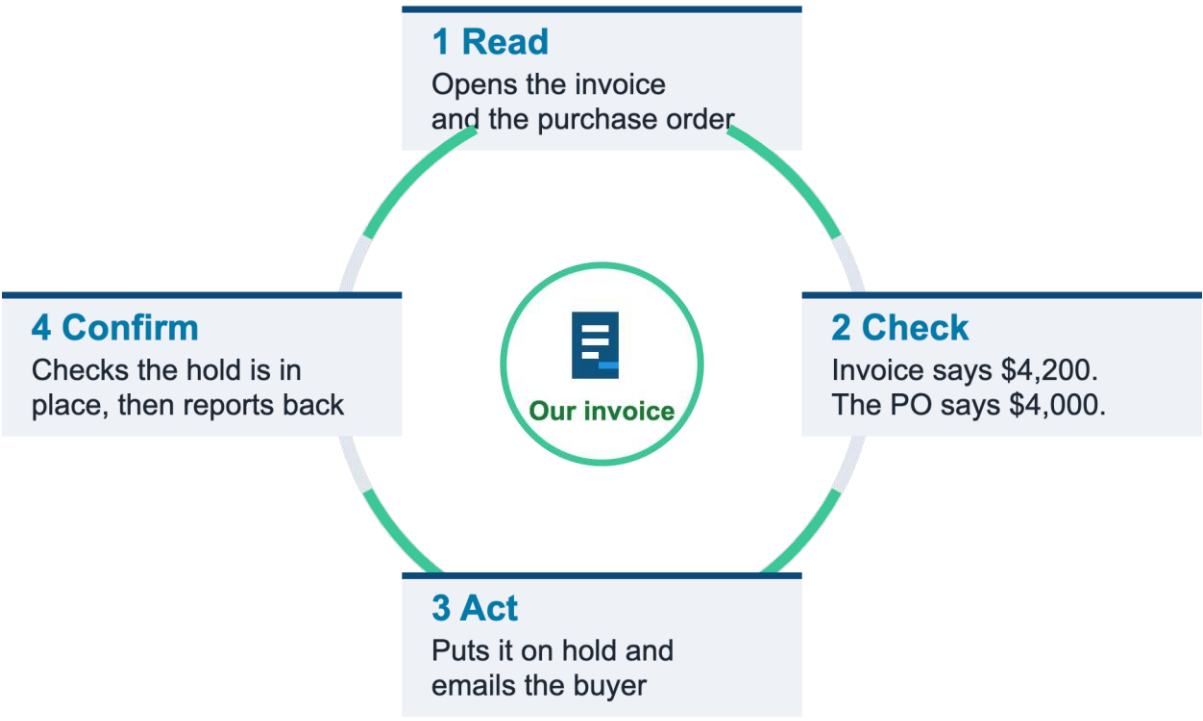

THE PIECES AT WORK

Model	Prompt	Context
Memory	Tools	Rules

THE AGENT STARTS A PROMPT

After this, the agent will use all the information in the context to help it complete the task. It will use the tools to get the information it needs. It will also use the rules to make sure it follows the correct process.

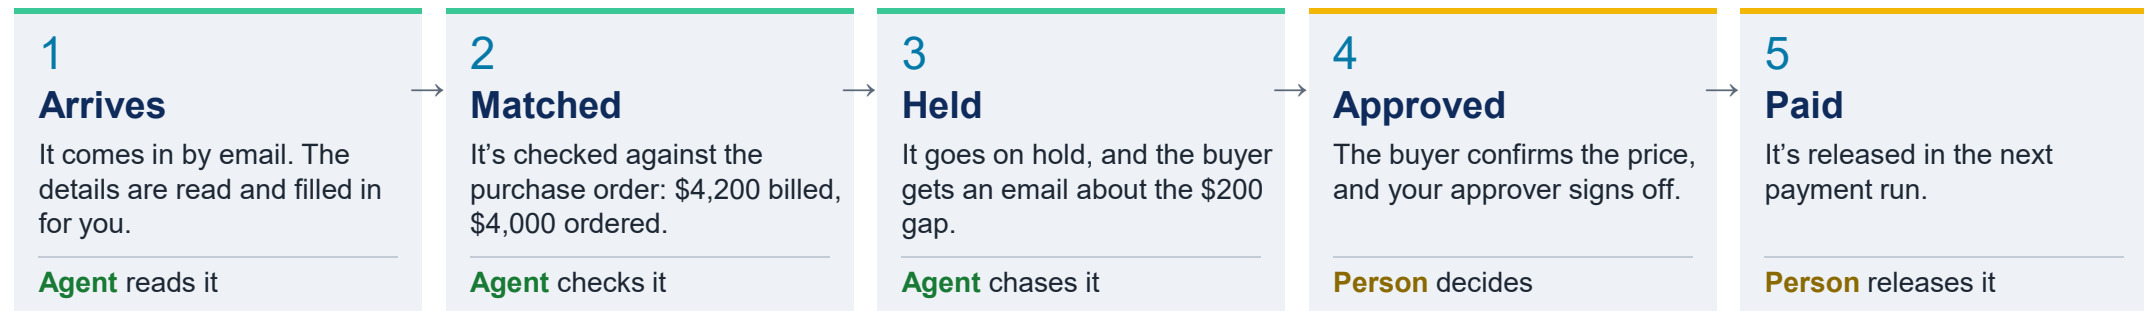

Now it can see your data and take actions. **So how do you stay in control?**

From an Agent to an Agentic Workflow

Let's follow **our invoice** from the inbox to payment. Then we'll name the parts.

INVOICE 10482 · LONE STAR OFFICE SUPPLY

THE AGENTIC WORKFLOW Your SOP, all five steps in order, with your rules and your people built in

An agent does one job. It reads the invoice, or checks the match, or chases the buyer. **An agentic workflow** runs the whole journey. It passes the work along and stops for a person before money moves.

In Oracle Fusion: Document IO is an agent that reads invoices. The Payables Agent is a workflow, from capture to payment readiness.

OUR RULE OF THUMB AI at the decision points. A person at the money points.

Sources · Oracle 26B readiness, Payables Agent: <https://docs.oracle.com/en/cloud/saas/readiness/erp/26b/fins26b/26B-fin-wn-f43769.htm>

Oracle press release, Sept. 29, 2026 (Fusion Agentic Applications): <https://www.oracle.com/news/announcement/oracle-extends-fusion-agentic-applications-with-introduction-of-fusion-claw-2026-09-29/>

Is It Safe to Give AI Your Data?

The risk isn't AI itself. **It's your data leaving the controls you've built.**

BE CAREFUL

Copying data out to a chat tool

- ✗ You copy invoice or supplier details into a chat window
- ✗ Once it's copied, your ERP can't control where it goes next
- ✗ Your ERP has no record of what was asked, or why
- ✗ The AI sees everything you pasted, account numbers too

CONNECTED TO YOUR ERP

AI inside your Oracle system

- ✓ Works on your live Oracle data. **Nothing to copy.**
- ✓ It stays in your ERP, under the same user roles
- ✓ Its work is recorded in your ERP, like any user's
- ✓ Sensitive fields can be masked before the AI sees them

Five questions to ask about any AI feature, including the ones you have today

- 1 Does my data leave our environment?
- 2 Is it used to train the model?
- 3 Can it see more than I'm allowed to see?
- 4 Does it leave an audit trail of what it did?
- 5 Who signs off before it posts or pays?

Sources · [1] Oracle, Data Handling in Generative AI: <https://docs.oracle.com/en-us/iaas/Content/generative-ai/data-handling.htm>
[2] Oracle Fusion Insider blog: <https://blogs.oracle.com/fusioninsider/apps-2025-update-ai-agents-ai-marketplace-and-more>

Part 1: What to Remember

Five ideas, and what each one means for your AP team.

THE IDEA	IN PLAIN WORDS	WHAT IT MEANS FOR YOU
1 An AI model	It learns patterns from examples.	Good AI needs good examples. Clean AP data pays off.
2 Next-word prediction	It gives the likely answer, not a checked one.	Keep a person reviewing anything that moves money.
3 Prompt and context	Your instruction, and what you hand it.	Your process knowledge is the skill. Better context beats clever wording.
4 Agents and workflows	An agent does a task. An agentic workflow runs the whole process.	Ask IT: can it only read, or also change things? You set the rules.
5 Your data	The risk is where your data goes.	Ask the five questions before you switch anything on.

PART 2 OF 4

What Oracle Gives You

Oracle's 15 AI capabilities, and what each one does for AP.

PART 1
The basics

PART 2
What Oracle gives you

PART 3
Finding your fit

PART 4
See it live

15 Capabilities, 3 Layers

Some are already in your ERP. **Others, your IT team can add for you.**

5	With your applications AI in Fusion, or alongside it	▪ Oracle AI for Fusion Applications ▪ Oracle Fusion Data Intelligence ▪ Oracle Digital Assistant*	▪ Oracle AI Agent Studio ▪ Oracle Analytics Cloud	READY TO USE Already in your screens. You switch it on.
8	Next to your data Add what the application doesn't cover	▪ Oracle AI Database 26ai ▪ OCI Generative AI ▪ OCI AI Services ▪ Oracle Integration 3	▪ Oracle APEX ▪ OCI Generative AI Agents ▪ Oracle AI Data Platform ▪ Oracle WebCenter Content	SET UP FOR YOU Your IT team adds it next to your ERP. You use it the same way.
2	Your own infrastructure When data can never leave	▪ Oracle AI Database Private Agent Factory	▪ OCI Compute (GPU instances)	FULLY YOUR OWN Runs in your own environment, for data that must never leave.

* **Heads up:** Oracle Digital Assistant for Fusion Apps is no longer supported after November 21, 2026. Oracle's path forward is Oracle AI Agent Studio.

Fusion Claw

JUST RELEASED · SEPT. 29, 2026

Works with: **Fusion**

Just released · Part of the Oracle AI Agent Studio family

FOR AP

The engine for agentic workflows in Fusion: AI that runs a whole process end to end, inside rules you set.

WHAT ORACLE ANNOUNCED

A new engine for Fusion Agentic Applications, so agentic workflows can take on longer, more complex work

25 new applications at launch, 75 in total, across finance, HR, supply chain and sales

First finance example: **Ledger**, which works through accounting exceptions ahead of close

Not announced yet: an AP-specific application, or pricing. Ask your Oracle team.

Sources · Oracle press release, Sept. 29, 2026: <https://www.oracle.com/news/announcement/oracle-extends-fusion-agentic-applications-with-introduction-of-fusion-claw-2026-09-29/>

IT ANSWERS TWO OF OUR FIVE QUESTIONS

“Who approves before it acts?”

Your rules, written down: objectives, policies, approval limits and when to escalate

“Is there a record of what it did, and why?”

A receipt for every run: what it was allowed to do, the evidence, the decisions and the transactions

Oracle Fusion Data Intelligence

SEPARATE SUBSCRIPTION

That's All 15

The full menu, in one view: 15 capabilities in 3 layers.

5	With your applications AI in Fusion, or alongside it	✓ Oracle AI for Fusion Applications ✓ Oracle Fusion Data Intelligence ✓ Oracle Digital Assistant	✓ Oracle AI Agent Studio ✓ Oracle Analytics Cloud	READY TO USE Already in your screens. You switch it on.
8	Next to your data Add what the application doesn't cover	✓ Oracle AI Database 26ai ✓ OCI Generative AI ✓ OCI AI Services ✓ Oracle Integration 3	✓ Oracle APEX ✓ OCI Generative AI Agents ✓ Oracle AI Data Platform ✓ Oracle WebCenter Content	SET UP FOR YOU Your IT team adds it next to your ERP. You use it the same way.
2	Your own infrastructure When data can never leave	✓ Oracle AI Database Private Agent Factory	✓ OCI Compute (GPU instances)	FULLY YOUR OWN Runs in your own environment, for data that must never leave.

That's the menu. **Now let's start with what hurts, not with the list.**

Start With the Problem, Not the Product

Pick the step that hurts most today. **Your IT team can match it to the right product.**

WHERE IT HURTS	WHAT AI DOES	IF YOU RUN FUSION	WITH ANY ERP
1 Arrives by email No more keying invoices	EXTRACT Reads the invoice and pulls out the fields	Document IO (replacing Intelligent Document Recognition)	OCI Document Understanding
2 Gets checked Fewer duplicates slip through	DETECT Flags the duplicate or the odd one out	Duplicate and anomaly flags in Fusion	OCI Anomaly Detection
3 Goes for approval No more chasing approvers	ACT Matches, routes and follows up, with sign-off where it matters	Oracle's Payables Agent	Oracle Integration 3 with Process Automation
4 Supplier asks "where's my payment?" Fewer status emails	ASK Answers from your own records	Oracle AI Agent Studio	OCI Generative AI Agents
5 Month end Fewer late surprises	PREDICT Forecasts cash and spots trends	Oracle Fusion Data Intelligence	Oracle Analytics Cloud

What You Already Pay For

Before you buy anything, **check what is already in your contract** and switched off.

6

Already licensed

Nothing new to buy. The only question is whether it is switched on.

Oracle AI for Fusion Applications with Fusion

Oracle AI Agent Studio with Fusion

Oracle AI Database 26ai with the database

Oracle APEX AI assistants and agents, with the database

Oracle WebCenter Content AI search and Q&A, with WebCenter

Oracle Digital Assistant AI chat, often in your contract

5

Pay as you use

Charged by usage, so a pilot costs very little.

OCI AI Services 5,000 free pages a month

OCI Generative AI

OCI Generative AI Agents

OCI Compute (GPU instances)

Oracle AI Database Private Agent Factory you pay for compute

4

Separate subscription

A real buying decision. Scope it carefully.

Oracle Fusion Data Intelligence AI-ready finance analytics

Oracle Analytics Cloud AI assistant

Oracle AI Data Platform

Oracle Integration 3 AI steps in your flows

What you're entitled to varies by contract, region and what you've signed. Treat this as the shape of the conversation, not a quote. Grouping is oAppsNET's summary of Oracle's published pricing, August 2026.

Sources · Document Understanding pricing (free tier): <https://www.oracle.com/artificial-intelligence/document-understanding/pricing/>

Part 2: What to Remember

Four ideas, and what each one means for your AP team.

THE IDEA	IN PLAIN WORDS	WHAT IT MEANS FOR YOU
1 The map	15 capabilities in 3 layers.	Start at the top: you probably pay for it now.
2 Your problem first	Start from what hurts, not from the product list.	Pick the step that hurts most. IT matches the product.
3 AI on the invoice	Extract, detect, act, ask, predict.	Pick the step that hurts most today.
4 What it costs	6 licensed, 5 pay as you use, 4 subscriptions.	Check what's switched off before you buy.

PART 3 OF 4

Finding Your Fit

Which of the 15 is right for you, and where to start when you're back.

PART 1
The basics

PART 2
What Oracle gives you

PART 3
Finding your fit

PART 4
See it live

Why So Many AI Projects Get Canceled

Better AI won't fix this. **Better choices will.**

THE PREDICTION

40%+

“Over 40% of agentic AI projects will be canceled by the end of 2027...”

According to Gartner, Inc. Press release, June 25, 2025

“...DUE TO” · WHAT IT LOOKS LIKE IN AP (OUR VIEW)

- 1 “escalating costs”**
The pilot was cheap. Running it for real wasn't.
- 2 “unclear business value”**
No one measured the before, so no one could prove the after.
- 3 “inadequate risk controls”**
The five questions never got asked.

Watch for “agent washing”: “Gartner estimates only about 130 of the thousands of agentic AI vendors are real.”

Sources · Gartner, Inc., press release, June 25, 2025: <https://www.gartner.com/en/newsroom/press-releases/2025-06-25-gartner-predicts-over-40-percent-of-agentic-ai-projects-will-be-canceled-by-end-of-2027>

Fit the System to Your SOP

Every AP team has an SOP. **The hard part is following it, and knowing when it wasn't.**

THE GAP	WHAT AI CAN DO	ON OUR INVOICE
1 It lives in people's heads	Your rules, written once in plain English, can become what the system follows. No reconfiguring the ERP.	"Hold anything more than 2% over the PO."
2 It isn't followed every time	Where AI does the work , agents follow your SOP every time, and stop for a person at the money points.	Our \$4,200 invoice was held, not paid.
3 Steps the ERP can't see	Calls and emails leave no trace in the ERP, and overrides often have no reason. AI checks for the proof, and flags what's missing.	If someone released our hold with no reason recorded, you'd know.

Works with any ERP, even one without AI built in. **The system fits your SOP, not the other way round.**

Streams Insights 14 AN-10007 x

Oracle AI Agent Studio · the Payables Agent

WATCH FOR

- 1 It checks the price against the policy's $\pm 3\%$ tolerance
- 2 It applies the approval rule: above \$100,000 needs a person
- 3 It stops and waits for that person's approval

Video: Oracle, "Demo: Oracle Fusion Cloud ERP: Payables Agent" (Oracle VideoHub)

Three Questions, in This Order

From 15 options to one place to start.

15 options in play

QUESTION 1

What may leave?

The constraint. Can this data reach a model outside your systems: yes, only inside your own cloud account, or never?

This alone removes most of the map.

→ **3–4** on the shortlist

QUESTION 2

Where does the work live today?

The location. Which system owns this process today: Fusion, EBS, the database, or your document store?

That names your shortlist.

→ **1** place to start

QUESTION 3

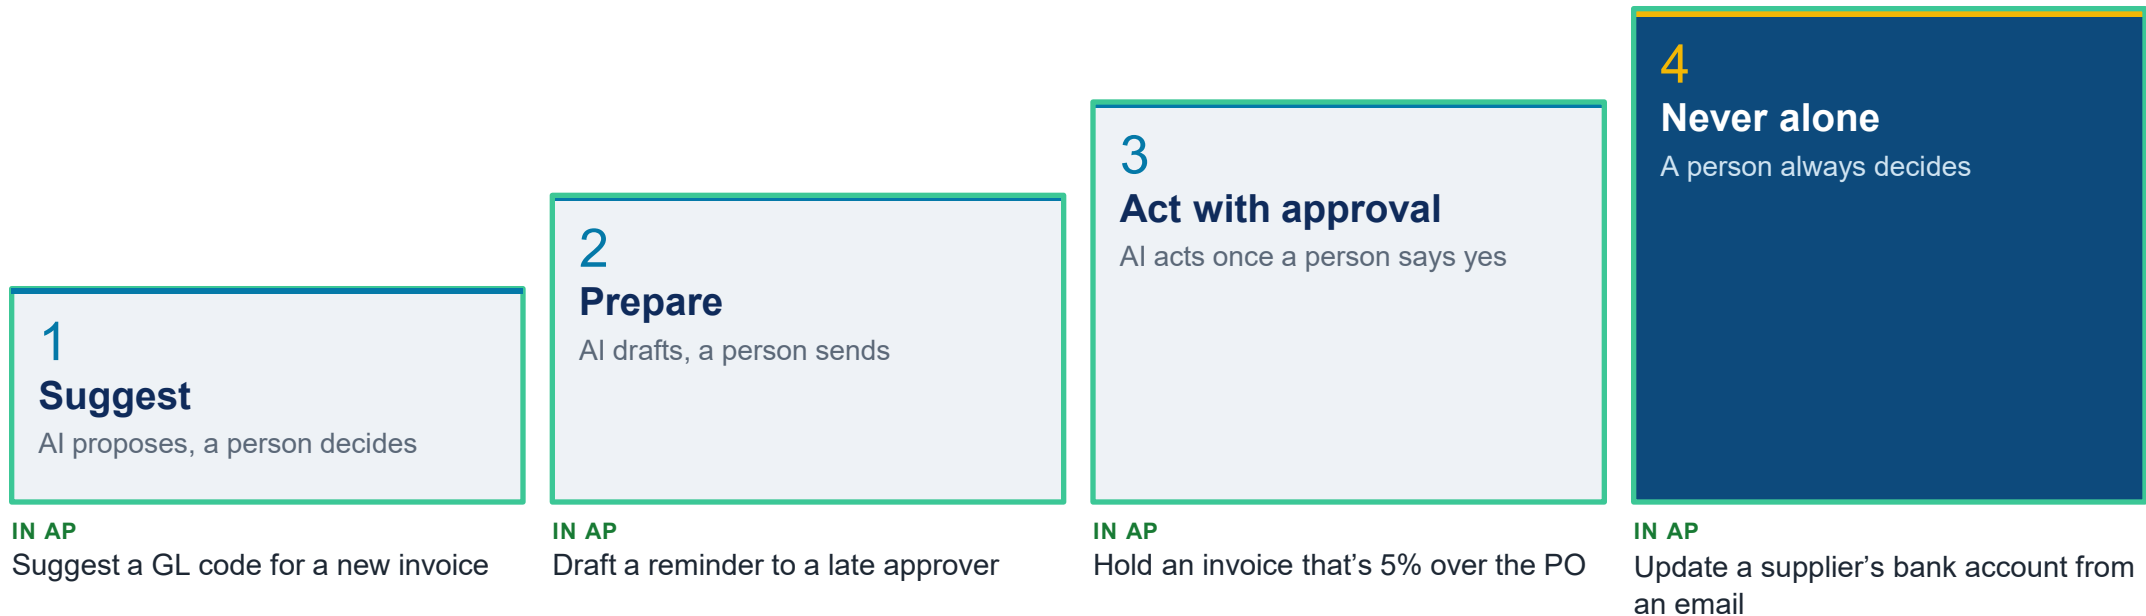

What do you already own?

The head start. Of what's left, what is in your contract and switched off?

Start there. It's often free to try.

If It Moves Money, Keep a Person in It

Decide how far AI may go, step by step. **You set the line, not the vendor.**

Task 4: Can I pay a bill without a person's approval? Which step?

Four Roles, Four First Moves

Same 15 capabilities. A different first step depending on where you sit.

IF YOU ARE THE...	YOU'RE BEING ASKED	YOUR FIRST MOVE
Sponsor	<i>"Is this worth funding?"</i>	Fund a pilot on something you own. Measure one number, like the share of invoices nobody touches.
Director	<i>"Where do we start, and what do we skip?"</i>	Answer "what may leave?" first. Then one process, one outcome, one quarter.
AP Manager	<i>"What changes in my queue?"</i>	Pick the step that hurts most today. Measure it before and after.
User	<i>"Is this replacing me?"</i>	It takes the keying and the chasing. The judgment stays with you.

PART 4 OF 4

See It Live

Two demos on real AP work, each built on what Oracle gives you.

PART 1
The basics

PART 2
What Oracle gives you

PART 3
Finding your fit

PART 4
See it live

AP Portal

DEMO 1 OF 2

Works with: **Oracle EBS or Fusion**

Live demo

WHAT YOU'RE ABOUT TO SEE

An invoice arrives by email and is read, checked against your SOP and made ready for review, on EBS as well as Fusion.

WATCH FOR

- 1 An emailed invoice is read and its fields pulled out
- 2 The data is checked against your ERP, and anything odd is flagged
- 3 A person reviews the exceptions and approves

HOW IT CONNECTS TO TODAY

CAPABILITIES	6 of 15 Oracle AI Database · 10 of 15 OCI AI Services (Document Understanding)
APPROACH	Shape it: building blocks on top of your ERP
HOW FAR AI GOES	Suggest: AI reads the invoice, your team approves
ROLE	AP Manager and User

Global Risk Agent

DEMO 2 OF 2

Built in: Oracle Fusion

Live demo

WHAT YOU'RE ABOUT TO SEE

Before you pay a new supplier for the first time, check who they really are.

WATCH FOR

- 1 A new supplier is screened against LSEG global risk data
- 2 Matches and red flags are shown for review
- 3 Next: confirming supplier bank details before the first payment

HOW IT CONNECTS TO TODAY

CAPABILITIES	2 of 15 Oracle AI Agent Studio, plus outside data from LSEG
APPROACH	Shape it: a Fusion agent connected to outside data
HOW FAR AI GOES	Never alone: AI flags the risk, a person decides on bank details
ROLE	Director and Sponsor

Back to Our Invoice

Remember our \$4,200 invoice? Here's where it ended up.

1 Read on arrival The invoice and PO were pulled in	2 Price gap caught \$4,200 billed against a \$4,000 PO	3 Put on hold The buyer was asked to confirm	4 Supplier checked Before the first payment, as your SOP says	5 A person approved Nobody let the AI pay it alone
---	--	--	---	--

That's what you switch on. **Now, where do you start?**

Add Up Your Score

Out of 10. Then rate your confidence again, and see how far you've come.

0–3

Getting started

Find out what you already have. Start with the back of your scorecard.

4–7

Ready to pilot

Pick the step that hurts most. Start at Suggest.

8–10

Ready to scale

Write your rules down. Move up one step at a time.

Now rate it again: **how confident are you explaining AI to your CFO?**
Compare with your first answer.

based on your score? Scan here.

Actionable Takeaways

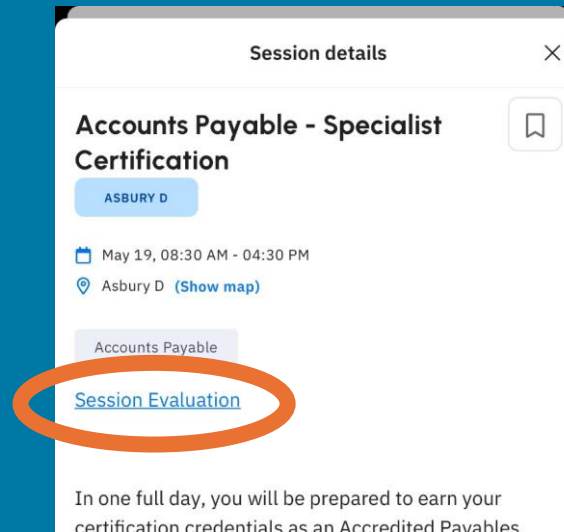

Four things to do in your first week back, without buying anything.

WHAT YOU'LL HAVE

- | | | |
|---|--|--|
| 1 | Start from your SOP, not the product
Pick the AP step that hurts most, note where your SOP breaks down, and measure it today. | One AP step, measured, with its weak spots noted |
| 2 | Find out what you already have
Share the back of your scorecard with your ERP or IT lead, and ask them to fill in your “Not sure” rows. | A list of the AI you already own, filled in by IT |
| 3 | Ask the five questions before you switch anything on
Including AI you already have. Start with: does my data leave, and who signs off before it posts or pays? | Five answers for each AI feature you use today |
| 4 | Decide how far AI may go, task by task
List your top five AP tasks. Mark each one: AI suggests, AI prepares, AI acts with approval, or never alone. Then get it signed off by whoever owns your AP controls. | A one-page list, signed off by your AP control owner |

Please tell us what you think!
